

**UPPER
ELEMENTARY**

**GRADES
1ST THROUGH 4TH**

THE MISSION

FCCS strives to make upper elementary a foundation for intermediate years. Along with strong math, reading, writing skills, our teachers strive to use hands on experiences to teach students. Each morning begins with a Bible lesson rooted in God's word. On Wednesday, we celebrate chapel together as well as our outdoor curriculum, Green Engineering. Throughout the week, we have host specials such as music, art, STEAM and recess. Beginning in grade 4, we offer a LEGO robotics team called the Coding Colts. As teachers build a strong academic foundation, students also learn important social skills within community building activities.

We take literacy very seriously and arrange for students to be screened for phonological awareness. Upper elementary is meant to be one of the most memorable times and we long for students to love school
