

FAITH COMMUNITY CHRISTIAN SCHOOL

Lifelong Explorers on a Christian Journey

September 28, 2022

Dear Families,

As a part of our partnership with you, we want to make sure we are updating our security system. We received a security grant from the state last year and it was a huge blessing for us. We are in the midst of updating our system to accommodate our population growth. With many students and many more electronic devices, we are working to make sure our campus is safe.

We are entrusted with the greatest responsibility, your students. It is our desire to make sure we do our due diligence in helping our campus stay safe. Recently, we have updated areas in our school with surveillance cameras in common areas as well as updating our school's computer firewall in order to protect our students via cyber security.

We are committed to keep our students safe and pursue measures in order to make sure they are being taken care of while on campus. We value your partnership.

Blessings,

Amy Bell
